Buy it:
RHS geranium collection

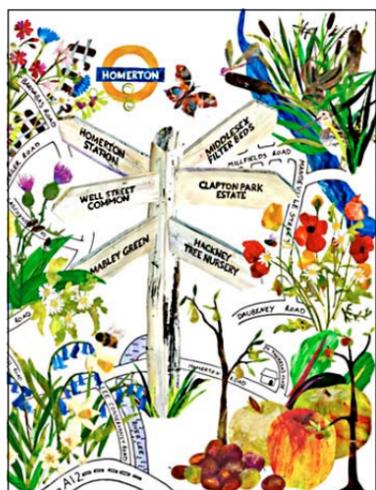

ADAPTABLE and undemanding, these popular perennials fit into most planting styles, making handsome, leafy ground cover as well as providing cheerful flowers over a prolonged period from early summer. The RHS is offering three of each of the following three varieties for £19.99, supplied as plug plants: Geranium Summer Skies, with green-centred double flowers of pale violet to lavender, grows to 60cm; Geranium pratense Plenum Album, which has loosely double, veined white flowers and grows to 90cm; Geranium pratense Plenum Violaceum, with small, pompom-like flowers, each packed with violet petals, grows to 60cm. The nine-strong collection costs £44.97, saving £15, but Homes & Property readers can save a further 15 per cent by entering code 300612 at the checkout on rhsplants.co.uk. Offer closes midnight July 3.

Work and play: a tree makes a leafy parasol over a meeting table (left); sports screens in the lounge can also show PowerPoint spreadsheets

Rooftop that does the business

One office garden proved that outdoor space can be used for work, rest or play

GIVEN a rooftop space above an office, the obvious solution would be to make it a garden in which workers could enjoy lunch in pleasing surroundings. Garden designer Patricia Fox, however, took the idea further – and in her garden at this year's Chelsea Flower Show displayed how an office garden could function not just as a restful, beautiful space, but as an effective workplace as well.

Pattie Barron

Everything in the garden has rounded corners, inspired by the iconic shape of the iPad and iPhone

"The aim was to design a space where technology meets tranquillity," says Fox who, in the Rooftop Workplace of Tomorrow in association with Walworth Garden Farm, and sponsored by RBS, succeeded admirably, winning a Silver Medal for her efforts.

At first glance, the garden seems a cool, contemporary space with modernist white furniture and a sports screen, making it the ideal chill-out lounge, but a closer look reveals a raft of technology to aid, refresh and inspire the office worker.

A lounge area at the back of the garden, marked with a high-rise wall of leafy Acer campestre and covered with a weatherproof canopy, is the ideal place for meetings or even small conferences; the big LED sports screen on the back wall provides a constant run of relaxing, dreamy visuals but can also provide PowerPoint images and spreadsheets. Due to artfully placed

of thyme and lavender as well as stachys, Convolvulus cneorum and lamium. These are, moreover, all tough, resilient plants ideally suited for rooftop conditions.

Structure in the garden is provided by chunky box cubes, thyme balls and box hedging, all in a rounded square shape. In fact, everything in the garden – the furniture, the pleached trees, even the blocks of soothing silver and green planting – has rounded corners. The inspiration for this came from Fox's observation of the iconic shape of the iPad and iPhone.

"Having no sharp edges makes the visuals easier on the eye, and gives a more tranquil environment, too." Naturally, the garden has green credentials: all the furniture is made from upcycled materials, the decking is constructed from ecologically sound, fast-growing bamboo and the tabletops are made from compressed, recycled paper.

Meanwhile, the permanent roof that covers the modular office building is planted with wildflowers and blue-grey festuca grass to encourage wildlife as well as absorb rainwater.

Although this rooftop haven was designed with an office building in mind, the ideas in it – even the planting blocks – can be scaled down or adapted to suit the smallest town garden or patio. The room outside has never been so versatile – or so exciting.
